Experienced Frontend Engineer skilled in React and Angular with a strong background in banking and international Agile teams. Known for effective problem-solving, excellent communication and fast adaptability to new technologies and environments

PROFESSIONAL EXPERIENCE

Current Activities – (since 09/2025)

Zurich (Switzerland)

- Improving core Java and backend skills through intensive course: OOP, Stream API, Spring Boot REST APIs, SQL (JDBC/JPA), testing(JUnit/Mockito), Maven/Git/Docker.
- Attending an intensive German course to enhance workplace communication.

Software Developer 05/2023 – 09/2025

Dreipol, Zurich (Switzerland)

- Developed and maintained web applications and component libraries using React, Angular and Next.js
- Designed and implemented reusable, configurable UI components with customizable colors, sizes and behaviors.
- Built and maintained shared component libraries (e.g. buttons, cards, icons) based on MUI.
- Collaborated with UX/UI via Figma, implemented client requirements, CI/CD with Git/Jenkins.
- Ensured scalable, accessible UIs; fixed bugs and conducted code reviews
- Cooperated directly with clients during calls to gather requirements, discuss solutions, and implement feedback.
- Identified and fixed bugs reported by clients and internal teams.
- Ensured UI consistency, code quality and scalability across applications.

CERTIFICATIONS

- CodersLab BootCamp

EDUCATION

University of Economics (Wrocław, Poland) 2019

Management and production
engineering / Bachelor of
Engineering

Zespół Szkół Elektronicznych i Samochodowych (Zielona Góra, Poland) 2010

Professional certificate as
technician and computer scientist

Junior Software Developer 10/2022 – 04/2023

BNP Paribas, Warsaw (Poland)

Worked on an existing web application (Angular) for bank employees under the guidance of a mentor

- Developed new Angular components and fixed user issues in Agile (Scrum) teams with Git, Jira, Gerrit.
- Implemented user-reported fixes and developed new components and functionalities.
- Improved application's appearance and performance.
- Collaborated with backend devs, UX designers, product owners to improve web app performance and UI.

Securities Specialist (AO) 03/2021 – 09/2022

UBS Business Solutions, Wrocław (Poland)

Handled booking and settlement of securities trades, coordinated instructions with international counterparties and monitored transactions on value date to prevent settlement issues

- Booked trades and released instructions for inbound, outbound and internal security transfers, buys and sells.
- Negotiated settlement instructions with international counterparties.
- Monitored transaction settlements on value dates.

Banking Operations Specialist II 09/2019 – 03/2021

Credit Suisse, Wrocław (Poland)

Processed and validated client settlement orders, transformed unstructured requests into standardized messages and resolved settlement exceptions across global markets.

- Received and validated client settlement orders via SWIFT.
- Resolved processing STP exceptions on settlement orders.
- Transformed unstructured orders into standardized transaction messages using manual capture in various tools.
- Repaired and released settlement instructions for custody transactions across global markets.
- Monitored, identified and escalated settlement fails on position and cash sides.

IT Service Desk Specialist 09/2018 – 12/2019

Hemmersbach, Wrocław (Poland)

Answered support calls and emails from employees, created and monitored incident tickets, coordinated with remote engineers and ensured timely resolution of hardware and software issues according to SLAs

- Opened, monitored and updated incidents in the ticketing system.
- Communicated actively with engineers to support troubleshooting.
- Contacted customers via phone and email to resolve issues.
- Ensured compliance with SLA timelines.
- Analyzed and validated data in orders continuously.
